GOOD DESIGN CONCEPT IN METAL FURNITURE DESIGN

DR. AMR M. A. HEDEYA¹

¹Assoc. Professor, Faculty of Applied Arts- Helwan University- Orman-Giza- Egypt

Abstract

Good Design is a very important concept in the design process, designers present their designs for the community and they listening to the feedback, which means an assessment for the design process outputs, all people can evaluate the design according to their experience, common people can say it is a good design or it is not, but experts when they say it is a good design, they evaluate the design functions such as usability, synthetic, economic or another functions, this means that design outputs is a coding message from the designer to the world which can decoding the message to evaluate the design and judge, if this design is good or not, which reflect the design functions. Metal Furniture products have a wide spread on many fields which affect the people life, it may be make their life easy and comfortable or not, metal furniture users have to be happy and proud with them products. For this reason, this paper focuses on the standards of product design process evaluation, to decide if it is good or not?.
