### **ABSTRACT**

Generally the traditional society was divided into two part it has one rural and another urban, from as urban Centre's had distinct lifestyle in comparison to the rural way of life. In the modern way of life the urbanization is considered to be associated with the process of economic development and good quality of life because of the types of facilities and opportunities it offer to its inhabitants and it is an economic and geographic necessity of today despite the massive environmental and ecological problems. In the meanwhile looking towards the urban population decade wise growth has been rapidly increasing day by day in the country as well as state like Karnataka. In the other hand the serious problem of rural to urban migration is also increasing and it is one of the main causes to boosting of urban population growth. In the present situation urban population has facing so many problems in day today life and it has mainly affecting their social life as well as the condition of their health and environment. In this backdrop the present study makes an attempt to know the prospectus of the urbanization and its population growth, how migration supported to growth of population in urban area and its impact on urban population and their problems? How disturbing their social life? These are all aspects were discussed under the study of problems and prospects of the urbanization as per availability of secondary level data like census data, research papers, books, Government reports, and documents were used to related Karnataka state.
