ABSTRACT

People resistance against the anti-people welfare rule have found frequently in the world history. Such types of these oppositions recorded as revolutions. The world history contains lots of success and failure revolutions. These revolutions against tyranny or incompetent rule have succeeded in many times; they also designed the new social and political administration. At the same time, a number of unsuccessful revolutions caused many terrible deaths. The various communication methods played a vital role for all revolutions. This paper validates; how the advancement of information technology will assist the communications to accelerate the oppositions by the people or opponents against the state or government and the understanding the various statuses, morality and personal ideology of the people who use the facility to criticized the state or government.

Key words: Resistance, Communication, Social networks, Progressive people, revolution
