SMART CLASS: A PEDAGOGICAL APPROACH TO SOFT SKILL LEARNING

JOHNY K P¹

¹Research Scholar, Bharthiar University, Coimbatore

Abstract

The 21st century has been recognized as the “Science and Technology Age”, and technology in education has become an “inevitable essential” for every child of the present world. Technology has played a major role in improving the modern education system at various levels of learning especially soft skill learning. The article explains the meaning of soft skill and how smart class technology becomes a pedagogical approach to soft skill learning. The essay concludes with the benefits of digitalization of soft skill learning.

Key words: pedagogy, soft skill, Educational technology, digitalization, Individualized Learning
