Abstract

Bibliometric study provides the quantitative and qualitative analysis of the progress of soft skills, as reflected in its publication output reported in the mainstream of National and International Journals. This paper aims to determine the growth of literature, year wise distribution, authorship pattern, degree of collaboration and correlation among the contributions and contributors by the research publication of web of knowledge for the period of 1999 to 2012.

Keywords: Co-authorship, citations, contributions, Scientometrics.
