### Abstract

Chittoor District is an agriculturally under developed district. In order to increase the agricultural productivity, PACS are playing vital role to providing credits for farming community. In the District, Primary agricultural credit societies are functioning in most dynamic manner by providing adequate, cheap and timely credit to agriculture and allied sector. PACS have been spread to the remote areas of the district in order to provide better credits of the needy farmers. PACS could have directly supporting to farming community to increase area of cultivation, production and productivity of agricultural crops particularly principal crops in Chittoor District. On this backdrop, an attempt is made to analyze the impact of primary agricultural cooperative credit societies on the agricultural productivity in major principle crops of the Chittoor District. It observed that impact of PACS agricultural productivity has been increased and earned good income.
